

BBM460- Wireless and Mobile Networks Laboratory

2025-2026 Spring

Instructors

- R.A. Hikmet Can Doğancı
 - Room: 226
 - Email: hikmetcandoganci@cs.hacettepe.edu.tr
- R.A. Zeynep Bala
 - Room: 118
 - Email: zeynepbala@cs.hacettepe.edu.tr

About the course

- This course will be held online via Zoom or Teams.
- When the lesson will be held, the meeting link will be announced on the Piazza.
- If there is no announcement, there will be no class.

Communication

Announcements and course related discussions through

<https://piazza.com/hacettepe.edu.tr/spring2026/bbm458/>

Project

Four reports throughout the semester.

- Proposals
- Software Design
- Progress
- Final

Projects can be done in groups of up to 2 students.

Project Grading

- Proposals (%15)
- Software Design (%20)
- Progress (%15)
- Final (%50)

Schedule

Reports	Date
Proposals	10.03.2026
Software Design	31.03.2026
Progress	21.04.2026
Final	19.05.2026

Project Proposal Report

At least, the content should contain the following titles:

- Group members
- Project Title
- Project Summary
- Method
- Technologies to be used
- Project plan (timeline)
- References

Project Concept

- There is no specific project idea.
- You are free to select any idea that you would like to implement.
- Your project must have at least 1 structure that uses the MQTT protocol.
- This website lists several project ideas (You can also propose your own idea):

<https://www.elprocus.com/wireless-communication-projects-for-engineering-students/>

<https://nevonprojects.com/wireless-communication-projects/>

Platforms

You can use

- devices like Arduino, Raspberry Pi etc.
- simulation program like [Wokwi](#)
